

About GTSE

The Green Transportation Summit & Expo (GTSE) is the region's premier fleet modernization and alternative fuels event. GTSE events offer the best combination of information-packed sessions, prominent national and regional speakers, and the latest technologies from industry leaders.

Fleet managers and clean-fleet stakeholders have relied on previous years' Green Transportation Summit & Expo events to give them the best value for their time and budgets. The 8th annual installment promises to continue that trend, with top-notch education and networking opportunities attracting the professionals who are determining the future of their fleets, companies and cities.

No other conference in the clean fuels sector can claim a stronger delegation from the fleet industry, and they keep coming back year after year. About 50% of attendees from past Green Transportation Summit & Expo gatherings were from corporate, municipal and other fleets, representing fleet management, operations, maintenance and other functions. They come from small towns, large companies and all variations between, each with a singular objective: to obtain the most up-to-date information about the alt-fuel sector and the technologies driving it.

Whether you focus on refueling infrastructure, alt-fuel vehicle conversions, balance-of-system components or another segment, the Green Transportation Summit & Expo will give you and your team members the opportunity to get in front of influencers and decision-makers. The expo gives ample time for attendees to walk the expo floor to catch up with old partners and make new contacts. Networking lunches are available on both days of the conference, and cocktail receptions offer further opportunity to mix with peers and colleagues.

The Green Transportation Summit & Expo doesn't try to be the biggest show - but it definitely works hard to be the best show. No other event offers better programming, access and value.
